Forecast for Tuesday 01 Dec 2020

Weather: Dry and clear overnight with a fairly widespread frost developing. A cold start to a bright morning with some sunny spells, although cloud above summits increasing. Then a cloudier afternoon with a few spots of rain around. Most places then dry but cloudy through the evening.

Chance of cloud free mountain/hill tops above 800m: Close to 100% through much of the day but falling to around 40% through the afternoon as cloud becomes occasional or periods above 600m. Chances continue to fall through the evening as cloud increases.

Visibility: Very good or excellent becoming good at times in rain during the afternoon.

Meteorologist's View

Valley temperatures around minus 1 or 2 Celsius at dawn.

Forecast for Wednesday 02 Dec 2020

Weather: Cloudy with outbreaks of rain through the early hours, the rain, turning to snow on the higher fells, clears soon after dawn with showers following. The showers turning increasingly to snow above about 450m through the afternoon and evening.

Maximum wind: Southerly 15-20mph veering westerly or southwesterly 20-25mph soon after dawn and then increasing 30mph in the afternoon, with gusts around 45mph over ridges and summits.

Chance of cloud free mountain/hill tops above 800m: Little chance at first with periods or persistent cloud above 450m and patches below soon becoming 40% with occasional or periods of cloud above 600m.

Visibility: Good falling to several kilometres in rain and showers and a kilometre or less in snow and snow showers.

Temperature: **Valleys:** Around 4 Celsius overnight rising to plus 7 or 8 Celsius
At 800m: Around plus 2 Celsius falling to minus 2 Celsius during the afternoon
Freezing level: Above summits falling to 900m towards dawn and then 600m through the afternoon.
